Sinclair ZX81 Personal Computer the heart of a system that grows

16K-byte RAM pack for massive add-on memory.

Designed as a complete module to fit your Sinclair ZX81, the RAM pack simply plugs into the existing expansion port at the rear of the computer to multiply your data/program storage by 16!

Use it for long and complex programs or as a personal database. Yet it costs as little as half the price of competitive additional memory.

With the RAM pack, you can also run some of the more sophisticated ZX Software – the Business & Household management systems for example.

You'll find the ZX81 an ideal introduction to the world of computing. And as your skills and needs develop, so your ZX81 system keeps pace.

You can add 16-times more memory with the ZX 16K RAM.

The exciting ZX Printer is now available.

And the range of Sinclair ZX Software is growing all the time.

Our latest product is the ZX81 Learning Lab described opposite.

To order any of these products, simply use the no-stamp-needed order form on the back of this leaflet.

Computer- rows with you.

ZX81 Learning Lab.

The ultimate course in ZX81 BASIC programming.

Some people prefer to learn their programming from books. For them, the ZX81 BASIC manual is ideal.

But many have expressed a preference to learn *on the machine, through the machine*. Hence the new cassette-based ZX81 Learning Lab.

The package comprises a 160-page manual and 8 cassettes. 20 programs, each demonstrating a particular aspect of ZX81 programming, are spread over 6 of the cassettes. The other two are blank practice cassettes.

The course requires absolutely no previous computer experience – even the words are explained as you come to them. And although there are sections on the 16K RAM pack and ZX Printer, all you need is a standard Sinclair ZX81.

The ZX Printer- for only £59.95.

Designed exclusively for use with the ZX81, the printer offers full alphanumeric and highly sophisticated graphics.

A special feature is COPY, which prints out exactly what is on the whole TV screen without the need for further instructions.

At last you can have a hard copy of your program listings – particularly useful when writing or editing programs.

And of course you can print out your results for permanent records or sending to a friend.

Printing speed is 50 characters per second, with 32 characters per line and 9 lines per vertical inch.

The ZX Printer connects to the rear of your computer – using a stackable connector so you can plug in a RAM pack as well. A roll of paper (65 ft long x 4 in wide) is supplied, along with full instructions and an order form for more paper.

Order Form

To: Sinclair Research, FREEPOST, Camberley, Surrey, GU15 3BR.

Please send me the items I have indicated below.

Qty	Code		Item price	Total
